DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fukushima et al. JP 05343674, in view of Hsu 5,538,909.

Fukushima et al. discloses a method of forming an LDD transistor including forming a gate dielectric (8) and gate electrode (10) on a planar substrate (2), etching a sloping sidewalls in the substrate using the gate structure as a mask, doping the source and drain regions at a first angle, and doping the LDD regions at a second angle, wherein the first angle is greater than the second angle (see figs 6 and abstract).

Fukushima et al. does teach doping through sidewall spacers to form the LDD regions.

Hsu teaches doping LDD regions (38) by doping through sidewall spacers using an angled implantation (see fig. 3E and related text).

Therefore, it would have been obvious to one of ordinary skill in the art to modify Fukushima et al. as taught by Hsu, because to would allow for better control of the channel width.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin M. Picardat whose telephone number is 571-272-1841. The examiner can normally be reached on Monday-Thursday 7:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Zandra Smith can be reached on 571-272-2429. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
